

Bridle-less Riding Clinic

Experience the ultimate level of trust and connection with your horse!

Riding without a bridle is the ultimate test of the relationship between you and your horse. This unique clinic will put you on the fast track to the experience of unity, which comes from riding without a bridle.

What you'll learn:

- The step by step process that empowers you to work on and achieve bridle-less riding with your horse
- How to safely prepare your horse for bridle-less riding and the do's and don'ts of teaching your horse to respond without a bridle
- How to know when your horse is safe and ready for bridle-less riding
- How to develop an independent seat and improve your balance
- Strategies and tools for solving common pitfalls and problems that people encounter when attempting bridle-less riding
- How to develop the effective body language, feel, timing and balance that is required for bridle-less riding

This Course includes:

- Theory talk
- Theory booklet for you to keep
- Simulations
- Groundwork exercises
- Riding exercises
- Q & A

Requirements:

- Completion of the Introductory Horsemanship Clinic or previous knowledge of Natural Horsemanship
- This clinic suits any skill level, from beginner to advanced rider
- This clinic suits any discipline e.g. pleasure or competitive riding

„This event made me rethink my approach to riding my horse. I can now steer my horse without relying on my reins. He has become more responsive to my pressure and I'm looking forward to carrying on at home.“
